

DATA ENTRY

BROCHURE

We understand that data is the lifeblood of your organization. Accurate and efficient data capture / data entry is critical for transaction execution, decision-making and customer support. To that end, we have developed highly specialized data capture centers.

Not only can outsourcing your data entry requirements to can reduce the need for costly hardware and software expenditures, technical maintenance, and staff recruitment and training but our data capture centers can also accommodate the peaks and valleys of your business volume providing consistent turn-around at minimal cost.

Data entry includes data capture & keying, OCR, handwritten data and document coding.

Testimonials

"My company has a strategic partnership with Intercom for almost a year now. The experience has been extremely good. There has been essentially no down time (except for a few hours one day because of their T3 failure). The response time for questions and tech support is good and the price is excellent. We use all their data entry services including document coding and are enjoying double benefits - Excellent services at a very competitive price." David, E-Document Services Inc

"As far as Intercom is concerned, I had a great experience!" -- Chris Schobert, FCB

"We are a Canadian BPO centre and Intercom has added tremendous value to our business. The industry has been waiting for such a tremendous service. I have thus far had a great experience with Intercom in respect to their data entry and e-publishing services." Asif, Canada

Savings

With our proprietary software solution and a combination of front office operations in New York and back-office operations in India, Intercom offers very specialized services with considerable cost advantage to a tune of 20-50% over in-house or outsourced coding work. Scanning vendors, OCR vendors and Data Coding and Indexing companies nationwide have found our process to be a cost-effective way to manage document-

intensive cases without sacrificing the control that is essential for a successful outcome.
We work with you to develop an approach that will meet your needs and budget.

We aim at servicing US Based Legal Transcription, Scanning and Coding Bureaus instead of approaching the end client directly. In the present global business slowdown, especially in Information Technology field, there is a much greater need for better quality offering with competitive cost advantage. We have designed a package for US based Legal Scanning and Coding Bureaus to help them offer better services at reduced cost to their clients.

Call our sales representative at 212-480-4076 X 577 or write to dataentry@intercomindia.com to get an exact understanding of how much Intercom can save for you while offering a better workflow.
