

INSURANCE CLAIM

BROCHURE

Insurance Claims Forms Coding

Intercom Online is amongst the first few companies in India to provide Insurance Claim Coding services to the US Health Insurance Industry since last 3 years. Today we employ 65 full time trained personnel, working in two shifts, converting the hard copy Insurance Claim forms into client specific electronic format and delivering the processed data within the 24 hour Turn-Around-Time. We take up Commercial Blue Cross / Blue Shield, Medicare and CAMPUS Claims covering HCFA 1500, UB 92 and Dental forms.

We also take up hospital specific forms to be filled in the database.

One of our clients also is using our scanning services as well. The forms are sent to our NY office where they are scanned and uploaded for the Indian back-office. The originals are shipped back to the client.

We can also work with the US/UK based vendors as an outsourced vendor providing them with better services at a reduced tat and most competitive prices.

Testimonials

"My company has a strategic partnership with Intercom for almost a year now. The experience has been extremely good. There has been essentially no down time (except for a few hours one day because of their T3 failure). The response time for questions and tech support is good and the price is excellent. We use all their data entry services including document coding and are enjoying double benefits - Excellent services at a very competitive price." David, E-Document Services Inc

"As far as Intercom is concerned, I had a great experience!" -- Chris Schobert, FCB

"We are a Canadian BPO centre and Intercom has added tremendous value to our business. The industry has been waiting for such a tremendous service. I have thus far

had a great experience with Intercom in respect to their data entry and e-publishing services." Asif, Canada .

Savings

With our proprietary software solution and a combination of front office operations in New York and back-office operations in India, Intercom offers very specialized services with considerable cost advantage to a tune of 20-50% over in-house or outsourced coding work. Scanning vendors, OCR vendors and Data Coding and Indexing companies nationwide have found our process to be a cost-effective way to manage document-intensive cases without sacrificing the control that is essential for a successful outcome. We work with you to develop an approach that will meet your needs and budget.

We aim at servicing the US and UK Based Insurance Coding Companies and Scanning and Coding Bureaus instead of approaching the end client directly. In the present global business slowdown, especially in Information Technology field, there is a much greater need for better quality offering with competitive cost advantage. We have designed a package for the US and UK based Scanning and Coding Bureaus to help them offer better services at reduced cost to their clients.

Call our sales representative at 212-480-4076 X 577 or write to inscoding@intercomindia.com to get an exact understanding of how much Intercom can save for you while offering a better workflow.
